What's New in the Vista Live Shell Pack - Grey?

Vista Live Shell Pack makes your Windows XP look like Windows Vista. The utility has the ability to change the look and feel of your system without having to do any reinstallation or fresh OS setup. It will install a new registry key called HKLM\Software\Microsoft\Windows\CurrentVersion\UIVL Hosts, and change the look and feel of your Windows XP to the look and feel of Windows Vista. What I would be able to do is go into the XP Explorer, change the Theme to Vista, and have it change the Classic theme to the Vista Blue and look like Windows Vista. But after, and after it completes the changes, there would be no way back to go back to the XP Theme. I know there are some other Vista Pack Utilities, which do exactly that, but they would not let you change back to the Classic Theme afterwards. This Shell Pack may allow the Classic Theme to be changed back. I do not want to use this Shell Pack, because Windows 7 is out soon, and I will be able to use the VHD's there, I do not want to loose the theme, or Vista style to go back to Classic Theme. Note that the above link, for Vista Live Shell Pack, seems to redirect to this one for Vista Live Shell Pack - Grey, which is not mentioned in the above link. I would like to know if this Shell Pack for Windows XP will change the Classic Theme. A: Vista Live Shell Pack - Grey does install a registry key under HKLM\Software\Microsoft\Windows\CurrentVersion\UIVL Hosts which changes the look and feel of Windows XP to Windows Vista. However, after the installation, there is no way to change the theme back from Vista.
