In the conversion process, you can choose whether to use the 4:3 ratio or 16:9. 4:3 format is widely used, while 16:9 is suggested for post-production. You can set the aspect ratio and frame rate. The maximum file size is 4 GB. You can also use the crop option to crop the video after conversion. By default, the size of the cropped video will be equal to the original. You can also set the output format, quality, and size for the output video after conversion. The profile is chosen from 1.0 to 4.0. Different profiles have different effects: 1.0: Original quality; 2.0: Slightly decreased quality; 3.0: Slightly increased quality; and 4.0: Almost doubled quality. In addition, the user can use audio track. Output audio track is set before conversion and does not affect the original source. You can check

and choose the selected output track to make sure the audio and video synchronization. This profile allows you to choose the output audio track. Some audio formats are able to be played on different devices, such as MPEG MP3, WAV, and AIF. VSO ConvertXtoDVD provides a flexible and easy-to-use cutting and splitting feature. The menu templates are quite easy to customize. If you are looking for an easy-to-use program, VSO ConvertXtoDVD is definitely what you need. It is worth trying. You can use VSO ConvertXtoDVD to cut an ultra long video to a certain size. While the original video is in 4:3 format and the target size is 16:9, VSO ConvertXtoDVD can choose different video and audio track for output. Some audio formats are not compatible with different devices, but MP3 is absolutely compatible with all media players. Video formats are mainly concerned with the playing speed. For example, 2-5 Mbps DivX videos can be played on media players at 16:9 or 2-10 Mbps H.264 videos can be played on devices at 4:3. Thanks to the menu templates provided, you will not have to perform any additional video conversion, splitting, and customizing work. But the menu template menu is not enough. VSO ConvertXtoDVD provides several cutting methods for you to choose according to your own needs. You can choose to cut files at the specified time, at the beginning or end, or cut from the beginning to the end. If you need to cut certain areas, you can also set the areas you need to cut and select the time interval at which you want to cut them. Thanks to the chapter optimization feature, you will not miss any part of the video. You can use a DVD menu template to help cut and split videos. But it is better not to cut videos without chapters for any reason. VSO ConvertXtoDVD can automatically add chapters to video files. However, it is better not to cut videos to only 30 minutes because of the different contents of long videos. You need to prepare the video you want to convert before you start.
